ANIK ROY

Full-Stack & Webflow Developer | AI-Augmented Web Architect

Dhaka, Bangladesh • anikroy302@gmail.com • +880 1722718821
Portfolio: dev-anik.netlify.app

PROFESSIONAL SUMMARY

Full-Stack & Webflow Developer with 2.5+ years of hands-on experience engineering scalable multi-tenant web applications, custom REST APIs, and 40+ high-performing Webflow digital experiences. Specialized in modern frontend architecture (React 19, Next.js 16) connected with robust Postgres/Supabase backends, Row-Level Security (RLS), and AI/Automation workflows (Groq API, ElevenLabs Voice AI, Python Telethon). Proven track record of building production-grade SaaS products with 90+ Lighthouse performance scores, complex accounting engines, and secure authentication systems.

TECHNICAL SKILLS

Frontend Architecture: React.js, Next.js (App Router), TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS v4, Framer Motion, GSAP Animations

Webflow & CMS Engineering: Webflow Designer, CMS Collections, Client-First Style Guides, Dynamic Bindings, Variable Color Tokens, Webflow Logic

Backend & Database: Node.js, Express.js, Supabase, PostgreSQL, MongoDB, Firebase Auth, REST APIs, JWT, Role-Based Access Control (RBAC), Serverless Functions

Security & Architecture: Row-Level Security (RLS), Database Triggers, Private Schemas, Server-side RPCs, Multi-tenant Isolation, Column-level Security

AI & Automation Tools: OpenAI APIs, GroqCloud API, ElevenLabs Voice Agents, Python (Telethon Scraping), Webhooks, Google Apps Script

Developer Tools: Cursor IDE, VS Code, Git, GitHub, Vercel, Netlify, Vite, Figma, Vitest, Lighthouse

FEATURED PROJECTS

Mess Mate – Shared Expense & Meal Management SaaS

Live demo: mess-mate-beryl.vercel.app

Tech stack: Next.js 16, React 19, Supabase (Postgres, RLS), TypeScript, Tailwind CSS v4, Turbopack, Recharts

- Built a Bengali, mobile-first multi-tenant Web SaaS that automates meal rate calculations, daily bazaar ledgering, and household bill splits for mess members.
- Engineered a bulletproof accounting model in TypeScript handling fractional meal weights (breakfast 0.5), edge-case zero-division warnings, and exact net balance balancing (0 taka drift).
- Enforced security & time rules at the database level using Postgres RLS policies, custom private schemas, server-side RPC functions, and Asia/Dhaka timezone edit-locks.

Bike Parts Management – Retail POS & Inventory Platform

Live demo: bike-parts-management.netlify.app

Tech stack: React, TypeScript, Vite, Supabase Auth & Postgres, Tailwind CSS, Netlify

- Developed a zero-cost-stack retail inventory and point-of-sale system tailored for motorcycle spare-parts shops in Bangladesh with Bangla UI.
- Built a triple-mode inventory system supporting Serialized (IMEI-style), Optional Serial, and Quantity-only tracking for stock purchases, counter sales, and customer returns.
- Implemented complete multi-tenant database isolation (1 Email = 1 Shop) using Row Level Security, custom printable cash memos, and passwordless OTP authentication.

FEATURED PROJECT

AI Portfolio Assistant & Conversational Agent

Live demo: dev-anik.netlify.app/

Tech stack: React, Next.js, GroqCloud API, ElevenLabs Voice AI, Telegram Bot API, Google Apps Script

- Integrated an interactive AI voice agent ("Tia") featuring voice navigation, real-time query resolution, and automated client lead logging to Telegram & Google Sheets via Webhooks.

PROFESSIONAL EXPERIENCE

Full-Stack and Webflow Developer | Softvence

Mohakhali, Dhaka | 1st Jan 2025 to Present

- Engineered 40+ custom Webflow websites featuring advanced CMS structures, dynamic client-first styling, and tailored JavaScript integrations.
- Integrated third-party APIs, serverless functions, and interactive UI components to drive dynamic web performance.
- Optimized cross-browser frontend performance, maintaining 90+ PageSpeed and Lighthouse metrics for enterprise and agency clients.

Frontend Developer (Contract) | ORBIK

Remote | Sep 2023 – Dec 2024

- Contributed to the frontend architecture and responsive design systems of core digital platforms using HTML, CSS, JavaScript, and Webflow.
- Translated Figma design tokens into clean, high-performing web components, optimizing speed and cross-device UI compatibility.

EDUCATION & TRAINING

- Bachelor of Science (B.Sc.) – Govt. Titumir College, Dhaka, Bangladesh
- Full-Stack Web Development Bootcamps (Batch 11 & Next Level Batch 6) – Programming Hero
