

ANIK ROY

Webflow Developer & Creative Frontend Architect

Dhaka, Bangladesh · anikroy302@gmail.com · 01722718821 · <https://dev-anik.netlify.app/>

PROFESSIONAL SUMMARY

Webflow Developer with hands-on experience designing, building, and deploying 40+ responsive, pixel-accurate websites in Webflow, including CMS-driven platforms, e-commerce builds, and premium/luxury brand sites for freelance clients. Skilled in Webflow's Designer and CMS Collections, custom interactions and animations, global design systems (style guides, variable color modes, typography scales), and third-party integrations (Zapier, Mailchimp, HubSpot). Extends Webflow builds with custom code, AI-powered features (OpenAI/Groq APIs), and JS-driven interactivity, with a strong focus on Core Web Vitals and Lighthouse 90+ performance.

TECHNICAL SKILLS

Webflow: Designer, CMS Collections & Dynamic Bindings, Interactions & Animations, Variable Color Modes, Style Guides & Design Systems, Webflow Logic, Responsive Breakpoints, Webflow MCP Tooling

Frontend: React.js, Next.js, TypeScript, JavaScript ES6+, HTML5, CSS3, Tailwind CSS, Framer Motion, GSAP

Backend: Node.js, Express.js, MongoDB, Firebase, JWT Authentication, REST APIs, Serverless Functions

AI & Integrations: OpenAI APIs, Llama Models, Groq API, streaming AI responses, prompt engineering, AI chat assistants

Integrations & SEO: Zapier, Mailchimp, HubSpot Forms, on-page SEO, Lighthouse auditing, Core Web Vitals

DevOps & Tools: Git, GitHub, Vercel, Netlify, Firebase Hosting, Figma, Adobe XD

EXPERIENCE

Webflow Developer | Softvnece

2025 – Present

- Designed and built 40+ responsive Webflow sites for clients across luxury, aviation, fulfillment, and legal service niches, translating Figma/Adobe XD designs with pixel-accurate fidelity.
- Built complete Webflow design systems — style guide pages, global color token/variable collections, typography scales, and reusable component libraries — for premium brand websites.
- Used the Webflow MCP tooling to manage large sites at scale: structuring CMS collections, styles, and page elements programmatically across multi-page builds.
- Extended Webflow sites with custom code and JS integrations, including GSAP-powered animations, dark/light theme systems using Webflow's native Variable Color Mode, and AI-powered lead-qualifier chat assistants for client sites. Integrated OpenAI and Groq APIs into Webflow/full-stack builds to deliver AI-powered features (content generation, smart search, chat interfaces) with streamed responses.
- Managed deployments and custom domain configuration, and achieved Lighthouse performance scores of 90+ across delivered sites.

Front-End Developer | Freelance & Product Development

2023 – Present

- Built and deployed 5+ full-stack applications using React.js, Node.js, Express.js, MongoDB, and Firebase; achieved Lighthouse performance scores of 90+ on all deployed projects.
- Implemented JWT-based authentication systems with protected route handling and RBAC dashboards for admin, editor, and viewer roles across 3 production applications. Integrated OpenAI and Groq APIs to deliver AI-powered features (content generation, smart search, chat interfaces) with streamed responses and loading state handling.
- Built and consumed REST APIs with Express.js; designed MongoDB schemas with indexing for sub-100ms average query response times.
- Wrote Vitest and React Testing Library test suites targeting 60%+ component coverage on core UI modules. Managed deployments via Vercel and Netlify with preview environments, environment variable management, and custom domain configuration

PROJECTS

Luxury Private Aviation Website (Webflow) · Webflow · Webflow CMS · GSAP. **Live site:** <https://airborne-v2.webflow.io/>

Built a full Webflow site hero sections, global navigation, footer, and a Charter Fleet page with five alternating aircraft category articles under strict brand constraints (no global body-tag edits, relative units only, four responsive breakpoints).

Designed and implemented a custom "Altitude" design system (typography trio, Titanium Gold/Obsidian color palette) as a reusable Webflow style guide.

Fulfillment Company Website (Webflow) · Webflow · CMS Collections · Webflow MCP

Built a full design system in Webflow including style guide pages, global color token collections, typography scales, and a three-column comparison/pricing section on the Home page.

Established efficient MCP-driven workflows for querying and updating elements and styles on large, complex pages.

Dark/Light Theme System (Webflow) · Webflow · GSAP · Variable Color Mode. **Live site:** <https://www.humanstudio.co.za/>

Built a dark/light mode toggle system combining GSAP animations, Webflow's native Variable Color Mode, and localStorage persistence.

Diagnosed and resolved a page-crashing script conflict causing a ReferenceError on load, restoring full theme-switching functionality.

AI-Enhanced Webflow Site with Lead-Qualifier Chat Assistant · Webflow · OpenAI/Groq API

Built a demo Webflow site for a law-firm niche featuring an embedded AI chat assistant that qualifies inbound leads in real time.

Designed the concept as a repeatable service offering for US small businesses seeking AI-enhanced website experiences.

AI Content Assistant · Next.js · TypeScript · OpenAI API · Groq API

Built a streaming AI interface with real-time token-by-token output; achieved Lighthouse scores of 96 (performance) and 100 (accessibility).

KEY ACHIEVEMENTS

Delivered 40+ responsive Webflow sites and 5+ full-stack apps with zero critical post-launch bugs.

Built complete Webflow design systems (style guides, variable color modes, typography scales) for premium/luxury brand clients.

Achieved Lighthouse performance scores of 90+ and SEO scores of 95+ across delivered client sites.

Built AI-integrated features (chat assistants, streaming content generation) using OpenAI and Groq APIs, shipped in production Webflow and full-stack projects.

Established reusable Webflow MCP workflows for managing CMS collections, styles, and page elements at scale.

EDUCATION

Programming Hero Bootcamp (Batch-11 and Next Level Batch-6)

B.Sc from Govt. Titumir College, Dhaka.

Supplementary learning: Webflow advanced techniques, system design patterns, REST API design, and frontend performance engineering through structured self-study and project-based practice.
